

HOT WIRE BOTTLE CUTTER

The HWBC-1 HOT Wire Bottle Cutter offers an easy and cost saving way for cutting container for selection weight analysis. A clean section without deformation will be obtained by a quick cutting of bottle through heated hot wire. A precision and repeatable cutting task is easy to achieve and it's necessary for a proper analysis.

With HWBC-1, a PET bottle could be cut up to predetermined sections, each section will be checked to ensure that it conforms to the exact weight assigned.

ATTRIBUTES:

- Bottle cut with accuracy
- Rapid warming the wire
- Energy saving Design
- Up to 5 section cut
- Durable Design
- Easy to operate
- Cutting up to 2 L bottle
- Safety cover design which exhaust gases out of face of the operator(optional)
- Excellent repeatability
- Preheating Mode/ Cut Mode (heating max)

TECHNICAL SPECIFICATION:

- Sample range: Maximum height 360mm, Maximum diameter 110 mm
- Power Supply: 220VAC/ 50 Hz
- Dimension: 47x51x35cm
- Net weight: 18 KG
- No. of wires – 3 nos. additional wires can be provided.
